

Body Worn Camera Program

The Lebanon Township Police Department is pleased to announce the implementation of the Motorola Solutions WatchGuard V300 body-worn camera system for officers. Maintaining the confidence of our community we serve is essential to effective and efficient delivery of policing services. Our continuing effort to promote transparency and accountability of law enforcement interactions with the public will be elevated through using this technology. The cameras are designed to memorialize police / citizen interactions from a first-person perspective capturing both video and audio. The cameras are utilized in accordance with Directive 2021-5, issued by the New Jersey Attorney General and the provisions of P.L. 2020, c. 128 & 129.
